

MPG is a not-for-profit association promoting gardening methods which work in Mediterranean climate zones.

MPG members enjoy

- A varied programme of events in the UK and overseas
- Access to the members' forum for knowledge sharing
- The opportunity to meet others with similar interests
- Visits to private gardens rarely open to the public
- Seed exchange scheme

MPG members vary widely from enthusiastic amateurs to professional horticulturists.

Some MPG members live or have holiday homes in Mediterranean zones, whilst others have no garden at all.
